

"H2O, Where Did You Go?" Teacher's Guide

"[H2O, Where Did You Go?](#)" is a fun K-6 appropriate, theatrical-style production that teaches students about the journey of water, the value of water, the water cycle, and the importance of water conservation. This production uses funny skits, songs, visual aids, and audience participation to engage students and maximize retention.

The following link will open a PDF document that lists the "Next Generation Science Standards" that this assembly addresses:

<http://showsthatteach.com/wp-content/uploads/2015/09/Science-Standards-in-H2O-assembly.pdf>

Teachers may print out a [coloring page](#) template for K-1 students.

PRIOR TO THE ASSEMBLY PERFORMANCE, we suggest that you introduce or review the following vocabulary terms used in the assembly:

conserve
fluid
drought
liquid
salt water
aquifer
fresh water
well

cycle
arid
percolate
solid
gas
aqueduct
precipitation
evaporation

condensation
accumulation
desert
survive
H2O
reservoir
vapor
transform

Teachers who will be attending the show are invited to download our original songs and lyrics free from the following webpage:

www.showsthatteach.com/watersongs

These fun and educational songs are paid for by your local water district.

Continued on the following page.

FOLLOWING THE ASSEMBLY PERFORMANCE, WE SUGGEST YOU ASK YOUR STUDENTS ...

- to define "fresh water".
- to name some sources of fresh water (where we access it).
- how the sun's heat affects water.
- (with their mouth wide open and close to their hand, as we demonstrated during the show) to blow moisture on their hand, then wave their hand to expose the moisture to the dry air. Ask students what happens to that water.
- for examples of precipitation (rain, snow, sleet, hail).
- to draw a picture of the water cycle.
- to draw a picture showing routes that water travels to our homes.
- to write an essay about (or discuss) why it is important to conserve water.
- to write an essay about (or discuss) five ways they can save water.

As a bonus, **kindergarten** and **first grade** teachers may treat your students to fun videos produced by our company.

These FREE 3-minute YouTube videos (featuring puppet characters) help TK-first grade students build vocabulary.
