

SONG LYRICS

That Can Has Worth

(M.Beckwith) ©2008 Building Block Entertainment Inc.

(CHORUS)

That can has worth
It came from the Earth
That can has worth
It came from the Earth
Took a lot of work
It came from the Earth

Rocks are found
Underground
In Jamaica...
Or Australia,
Let me tell ya

Mike's a miner who bores for ore

Bauxite ore
He searches for
Aluminum
And if he finds some?
Geologist Bob
Has the job
To smelt, smelt, smelt
That means
Melt, melt melt
Aluminum from the ore....
So you'll get your
Soda can
That's the plan

(REPEAT CHORUS)

Metal man Roy
Makes an alloy
With manganese and magnesium
Adds a little some
To the aluminum
It's ironed flat
By sheet metal Matt
Rectangles cut
Shaped like what?
Not a cube
Oh, a cylinder tube

The seam is held
With a brazing weld
Bottom goes on
Fluid goes in
And that's when
Fastener Fran
Seals top on can
With a rivet, rivet, rivet
Then she'll
Give it, give it, give it
To the next in the chain...
Warehouse Wayne

(REPEAT CHORUS)

Can is stacked
By forklift Jack
On a beverage truck
Then trucker Chuck
Closes the door
And drives the can
To a grocery store
Now let's review
Can is brought to you...by...
Chuck, Jack, Wayne, Fran, Matt, Roy, Bob and miner Mike
And one more if you like
Who?
The who is you
You know what to do
Recycle the can, man

(REPEAT CHORUS)

It came from the Earth
It came from the Earth
Worth!

From the album
"Singin' Green"
